

## BigBell Flex™

Open your door to everyone

The **BigBell™ Flex Alert System** is an ideal solution for any business where access to entry is an issue and building restrictions prevent permanent doorbell and/or signage mounting at the point of entry. This portable, wireless, customizable door access system is an affordable alternative to power doors and meets Americans with Disabilities Act (ADA) requirements. The BigBell™ Flex enables customers to easily request assistance with entry to your business establishment.

## BigBell™ Flex Alert System

### Overview

#### Create a Great Customer Experience

The BigBell™ Flex is set at the appropriate height for wheelchair access and features both the international symbol for wheelchair accessibility as well as directional signage, which can feature your company brand. When a customer approaches your business, he or she will see the BigBell™ Flex outside your entrance and know assistance is available. Pressing the BigBell™ touchpad will trigger an interior chime to alert your employees a customer is outside and requesting assistance. An employee can then assist the customer as necessary. BigBell™ Flex improves customer service, generates new retail sales opportunities, and encourages repeat business.

#### Thousands of BigBell™ Flex Alert Systems are currently in use:

- Libraries
- Police stations
- Restaurants
- Medical facilities
- Property management offices
- Schools
- Hotels
- Commercial & private properties
- Retail stores & other businesses
- Public attractions... and more!

### Proven Successful Solution

• Many small businesses have successfully overcome business access issues and avoided costly litigation and solved access issues with the BigBell™ Flex Alert System. Inclusion Solutions can create a custom program that will fit your company brand and communicate to all potential customers they are welcome in your establishment.
