

BigBell™

Open doors and welcome everyone

The **BigBell™ Alert System** is the best solution for any business where access to entry is an issue. This easy-to-install wireless door access system was developed as an affordable alternative to power doors and meets Americans with Disabilities Act (ADA) requirements. It enables customers to easily request assistance with entry to your store or restaurants.

BigBell™ Alert System

Overview

How to Create a Great Customer Experience

When a customer approaches your business they will see the BigBell™ outside the entrance at the appropriate height for wheelchair access. The BigBell™ is marked with the international symbol of accessibility, and accompanied by directional signage. The interior chime receiver alerts the employees that a customer is requesting assistance. The employee assists the customer as needed and the happy customer shares with others the great experience.

Key Features

BigBell™ will work for any kind of public building or business. Combine your BigBell™ Alert System with a ramp to increase access to commercial and residential properties.

- Oversized touchpad can be used by customers with limited dexterity.
- Wireless technology is easy to install. Receiver plugs into any standard A/C wall outlet.
- Flashing strobe receiver.
- Six ring tones, recordable chime, and adjustable volume control.
- Up to 1,500-foot unobstructed operating range.
- Additional signage options available
- Options for multiple entrances
