COMPONENTS IN BOX

1 Base Moulding

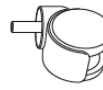

1 Lid Moulding

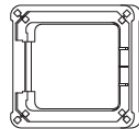

4 Twin Wall PP

4 Washers &
4 Lock Nuts

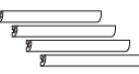

4 Corner Caps

1 Rim Moulding

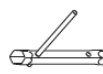

4 Fixing Pins

4 Extruded Aluminium
Corner Posts

4 Four Corner Caps

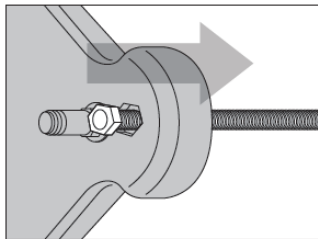

1 box Spanner & T-Bar

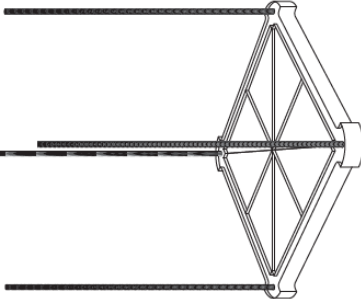

* For trays 800 only

ASSEMBLY INSTRUCTIONS

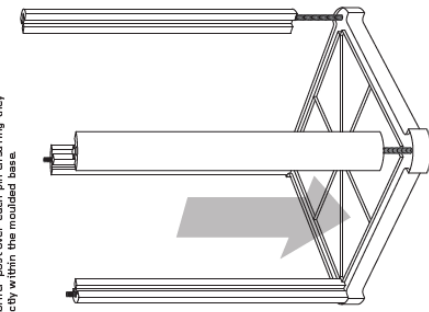

1 Insert the fixing pins into the base moulding until the retaining nut of the pin fits into the corresponding slot.

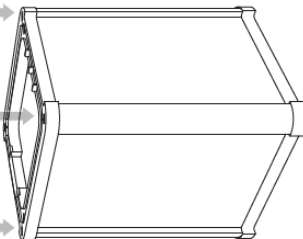

2 Slide a corner post over each pin ensuring they sit correctly within the moulded base.

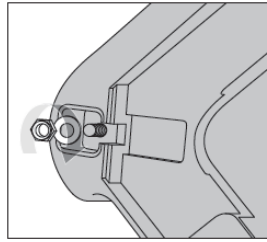

3 Slide the twin wall panels between each post using the recessed number of each post.

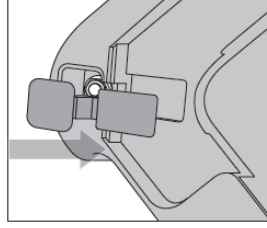

4 Fit the rim moulding to the top of the posts.

5 Ensure the pins protrude through the fixing holes of the rim. Using a washer and fixing nut, secure the pin. A box spanner and T-bar are provided so the fixing nut can be tightened fully. Do this for all four corners.

6 Insert the corner caps to cover the finishing nut and pin on each corner.

7 Fit the lid moulding onto the rim to finish the assembly.
